SYNTHETIC DEMONSTRATION / 08 NOV 2026

Product export comparison

See what changed before you decide what to import.

Read-only review of two normalized exports. Originals remain unchanged. No store connected, no customer data, no correction or upload performed.

7 distinct SKU keys	**6** review items	**1** unchanged key

Review decisions

SKU / finding	Before	After	Decision needed
SKU-A Price + stock changed	12.00 USD / 10	13.50 USD / 8	Confirm price +1.50 USD and stock -2 are intended.
SKU-BAD Invalid value	7.00 USD / 3	NaN USD / 3	Resolve invalid price. No numeric comparison.
SKU-DUP Duplicate SKU	2 source records	1 source record	Confirm unique identity. No arbitrary row chosen.
SKU-FX Currency changed	8.00 USD / 5	9.00 EUR / 5	Confirm currency. No FX or price delta calculated.
SKU-NEW Only in after export	Not present	11.00 USD / 4	Check intended addition and completeness of inputs.
SKU-OLD Only in before export	3.00 USD / 2	Not present	Check intended removal and completeness of inputs.

Scope and evidence

Two UTF-8 comma CSVs, exact sku/price/currency/stock schema, shared literal SKU namespace. This sample has 7 before records and 6 after records. Duplicate keys and invalid values block numeric comparison. Absence from an export does not prove removal from a store.

before.csv SHA-256: d40121fb968998b9450bcc179ec3017dd39b1787b6122db9931a5e9da89dc3c8
after.csv SHA-256: f9420df80dd8dce9165767d6454dba42bae42988e89ec9ca5de34c3273402ef4

Separate capability sample. The existing $49 structural CSV audit does not include this comparison. This is not a platform import certification, accounting audit or commercial quote. Mapping, input privacy, delivery scope and price require separate qualification.
